UNDERSTANDING HOW BUILDINGS EVOLVE

Building designers need to recognise this dimension of time and how it affects their proposals, recognizing that a building is likely to undergo many changes over its lifetime Designers can begin to learn about how time affects buildings by studying existing buildings and how users experience and adapt them over time Feedback about building

performance can help to develop an appreciation

Architecture and Evolution - JSTOR

building technology itself follows an evolutionary pattern Practical experience with earlier buildings once furnished much of the information about building performance that today comes from engineering modeling In effect, an earlier building served as a "model" for a new design The technological elegance of many early structural solutions
