TRAFFIC - SICK

Traffic safety Sensor solutions from SICK are used in many systems which contribute to the safety of rail transport The 2D and 3D LiDAR sensors from SICK, which are tried-and-tested in outdoor areas, are used for detecting obstacles in hazardous areas or for detecting landslides on rails SICK also offers a range of sensors for detecting

Intelligent Transportation Systems

FLIR's traffic sensors help you control traffic lights at intersections, so your urban traffic can flow smoothly In addition, they help optimize traffic flows for pedestrians and bicyclists and improve their safety in busy traffic scenes Highways FLIR detection technology helps avoid incidents and traffic jams on highways Early detection of road irregularities enables rescue teams to

the requirement of dedicated traffic sensors Key-Words: - ITS, cellular data, traffic prediction, MLP, GRNN, Vehicle Detection System, mobile network 1 Introduction Intelligent transportation systems (ITS) [1] have made significant advances in improving everyday life and reducing the cost and environmental impact of transportation The current research trends aim for the concept of smart

Project Documentation | UMRR Traffic Management Sensor ...

Smartmicro offers a family of traffic Radar sensors called UMRR - Universal Medium Range Radar Within this family, three different Radar generations exist: UMRR-0A, UMRR-0F and UMRR-0C For each Radar generation, a number of different antennas are available - so the permanent fixed field of view and max range can be selected by the customer This data sheet describes the UMRR-0C Type 42 3D

Understanding Data Streams in IoT Title - Sas Institute

Sensors like these have been used for many purposes over the years - in manufacturing, health care, energy, robotics, cars, airplanes and aerospace To capture and collect the signals coming from sensors, the operational historian emerged This database software application logs and stores historical, time-based data that flows from sensors

Solutions for Intelligent Year-Round Road Maintenance

the need to stop traffic or cut into the road Certain measurements, such as road salinity and ground temperature, can only be measured through physical contact with the road Vaisala's embedded sensors (DRS511 and DTS12G) enable those measurements and complement the information provided by the non-invasive sensors
