Introduction - unige.it

•Transport phenomena are really just a way that Chemical Engineers group together three areas of study that have certain phenomenological ideas in common These three areas of study are: -Fluid Mechanics -Heat Transfer -Mass Transfer Why do people group these phenomena together? •They study the transfer of something -Fluid Mechanics deals with the transfer of momentum in a fluid

Transport Phenomena - Universiteit Twente

In this course : Fundamentals of transport of momentum, mass and energy are introduced and applied, aiming to understand and (quantitatively) describe phenomena encountered in industrial/engineering practice and in daily life The course is integrated with the course Numerical Methods, in which modeling skills (in MATLAB) are developed and applied to mentioned situations Typical Transport
